

Clinical Pharmacy Services

Pharmacy is involved in all aspects of medication management. With the implementation of physician order entry, barcode technology, cartless distribution, robotics, and technical support for distributive functions, we are able to focus on clinical activities.

Hot Springs has seven Clinical Pharmacy Specialists (CPS) and ten technicians. Fort Meade has 17 CPS, and 12 technicians. There are two South Dakota State University (SDSU) College of Pharmacy faculty, three PGY1 residents and one PGY2 resident. The pharmacies are staffed Monday through Friday from 730a-515p, with limited holidays and weekends.

Educational Affiliations

The VA Black Hills Health Care System is a teaching institution affiliated with SDSU Colleges of Pharmacy and Nursing, University of South Dakota School of Medicine, and Western Dakota Technical Institute.

Federal Employment

Contingent upon completion of a physical exam, including negative drug test. Applicants must meet the requirements for federal employment. Residents are required to obtain a pharmacist's license in any state within 3 months of appointment.

CPS and residents use their prescribing privileges in collaboration with the medical team to help optimize patient care and reach treatment goals.

VA Black Hills Health Care System is located in the beautiful Black Hills of western South Dakota, where we are known for our blue skies, pine forests, rich history, moderate climate and friendliness. VA Black Hills provides primary and secondary medical and surgical care, along with residential rehabilitation treatment program (RRTP) services, extended nursing home care and tertiary psychiatric inpatient services, for veterans residing in South Dakota and portions of Nebraska, Wyoming, North Dakota and Montana. Care to approximately 20,000 veterans is delivered through the Fort Meade (near Sturgis) and Hot Springs VA Medical Centers, as well as through a number of our community based outpatient clinics and rural health clinics. VA Black Hills is part of the VA Midwest Health Care Network.

Residency Purpose:

PGY1 pharmacy residency programs build on Doctor of Pharmacy (Pharm.D.) education and outcomes to contribute to the development of clinical pharmacists responsible for medication-related care of patients with a wide range of conditions, eligible for board certification, and eligible for postgraduate year two (PGY2) pharmacy residency training.

Residency Description:

The VA Black Hills PGY1 Pharmacy Residency will train pharmacists in the setting of a large, rural VA health care system. While both inpatient and outpatient learning experiences are required during this program, pharmacist involvement in ambulatory care is broad. An elective teaching certificate program is available which equips residents to pursue a position in an academic setting. Feedback from both residents and preceptors is valued and used to proactively customize each resident's experience.

Area Attractions:

There are many places of interest located within the Black Hills area. Additional information can be found:
